- Special** Free-Style Beer

01 German-Style Leichtbier

Analytics

Original gravity:	6.0 - 9.5 °Plato
Apparent extract:	1.5 - 2.5 °Plato
Alcohol:	2.0 - 3.0 % by weight 2.0 - 3.5 % by volume
Bitterness:	14 - 28 IBU

Description

Bottom fermented

Low body

Malt character: low to medium

Hop bitterness: low to medium

Hop flavour and aroma: low to medium

No fruity esters or Diacetyl

Turbidity allowed

02 German-Style Pilsner

Analytics

Original gravity:	11.0 - 12.9 °Plato
Apparent extract:	1.5 - 3.0 °Plato
Alcohol:	3.6 - 4.3 % by weight 4.0 - 5.5 % by volume
Bitterness:	25 - 50 IBU

Description

Bottom fermented

Colour: light straw up to golden

Hop bitterness: high

Hop flavour and aroma: moderate, fine, quite obvious

However, the aroma may not be characterized by the utilization of aromatic hops by dry hopping

Attenuation degree: high

Body: medium to light

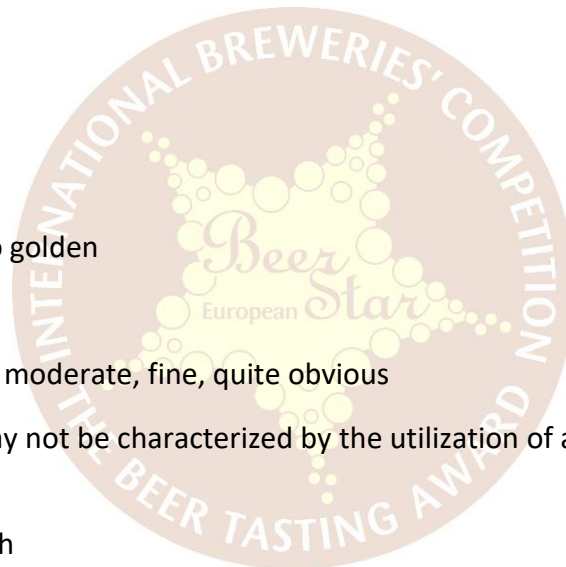

Flavour and aroma: little residual sweetness

No fruity esters or Diacetyl

Dense and rich foam

Beer is filtered

No chill-haze

03 Bohemian-Style Pale Lager („Ležák“)

Analytics

Original gravity:	11.0 - 12.9 °Plato
Apparent extract:	2.5 - 4.5 °Plato
Alcohol:	3.1 - 4.3 % by weight 4.0 - 5.5 % by volume
Bitterness:	20 - 40 IBU

Typical Examples:

- Bohemian-Style Pilsner
- Bohemian Style Lager
- Světlé Ležák

Description

Bottom fermented

Colour: rich yellow up to deep gold

Noticeable body (more than German-Style Pilsner)

Hop bitterness: high and balanced

Hop flavour and aroma: moderate

Malty, slightly sweet, medium body

Diacetyl: low content acceptable

Dense and rich foam

Turbidity allowed

04 Bohemian-Style Session Lager („Výčepní“)

Analytics

Original gravity:	7 – 10,9°Plato
Apparent extract:	1,8 - 3°Plato
Alcohol:	3,0 - 3,6 % by weight 3,5 - 4,0 % by volume
Bitterness:	20 – 40 IBU

Typical Examples:

- Světlé Výčepní
- Tmavé Výčepní
- Polotmavé Výčepní

Description

Bottom fermented

Colour: golden to dark brown

A lighter, refreshing everyday version of a Bohemian Lager with less intensity.

Due to the lower original gravity, less body and alcohol.

A pale colour version (Světlé) has less sweetness, while the dark version (Tmavé) has clearly sweet and dark malt flavours.

Hop bitterness: low to medium and very balanced

Fine and reserved hop aromas

Small amounts of Diacetyl permitted

Very good and dense foam

Turbidity is allowed

05 German-Style Märzen

Analytics

Original gravity:	13.0 - 14.0 °Plato
Apparent extract:	3.0 - 5.0 °Plato
Alcohol:	4.3 - 5.0 % by weight 5.2 - 6.7 % by volume
Bitterness:	18 - 28 IBU

Description

Bottom fermented

Colour: amber notes

Full-bodied. Emphasis on malt, sweet maltyness

Malt character: slightly roasted rather than strongly caramel (though a low level of light caramel is acceptable)

Flavour and aroma: slight bread or biscuit like malt character

Hop flavour and aroma: low but noticeable and clean

No fruity esters or Diacetyl

Beer is filtered

No chill-haze

06 German-Style Festbier

Analytics

Original gravity:	13.0 - 14.5 °Plato
Apparent extract:	3.0 - 5.0 °Plato
Alcohol:	4.3 - 5.0 % by weight 5.2 - 6.7 % by volume
Bitterness:	18 - 35 IBU

Description

Bottom fermented

Colour: golden

Body: medium

Malt character: clean, slightly sweet

Flavour and aroma: slight bread or biscuit like malt character

Hop bitterness: clean

Hop flavour and aroma: low but noticeable

No fruity esters or Diacetyl

Beer is filtered

No chill-haze

07 German-Style Helles

Analytics

Original gravity:	11.0 - 11.9 °Plato
Apparent extract:	2.0 - 3.0 °Plato
Alcohol:	3.7 - 4.1 % by weight 4.5 - 5.2 % by volume
Bitterness:	15 - 25 IBU

Description

Bottom fermented

Colour: straw up to golden

Bitterness: low to medium

Body: medium, emphasis on malt

Low levels of sulphur components caused by yeast are acceptable

Hop bitterness and flavour is low and balanced with the malt in order to keep the typical characteristics

No caramel character

No fruity esters or Diacetyl

Beer is filtered

No chill-haze

08 *Austrian-Style Märzen*

Analytics

Original gravity:	11.4 - 12.2 °Plato
Apparent extract:	1.5 – 2.9 °Plato
Alcohol:	3.7 - 4.2 % by weight 4.5 - 5.4 % by volume
Bitterness:	17 - 25 IBU

Description

Bottom fermented

The use of up to 25 percent unmalted barley or other adjuncts is permitted, but usually not common. The Austrian-Style Märzen tends to be slightly more hop character, less malty and slightly fruity compared to the Bavarian Helles.

Colour: golden

Bitterness: low

Body: medium, malty

Hop bitterness and flavour is low and balanced with the malt-take in order to keep the typical characteristics

No caramel character

No Diacetyl notes

Beer is filtered

No chill-haze

09 *International-Style Lager*

Analytics

Original gravity:	10.0 - 11.9 °Plato
Apparent extract:	2.0 - 3.0 °Plato
Alcohol:	3.3 - 4.1 % by weight 4.1 - 5.1 % by volume
Bitterness:	10 - 15 IBU

Description

Bottom fermented
Colour: straw yellow to golden
Bitterness: very low
Body: low to medium, slightly malty
Taste: neutral, slightly sweet
No caramel character
No fruity esters or Diacetyl
Beer is filtered
No chill-haze

This category is reserved for Lager beers which are brewed with alternatives for malt, enzymes or other internationally permitted adjuncts: Filtered Lager beers with the nomenclature “Hell” need to be submitted in category 7.

10 *New-Style Lager*

Analytics

Original gravity:	11.0 - 15.9 °Plato
Apparent extract:	2.0 - 3.5 °Plato
Alcohol:	3.6 – 6.2 by weight 4.0 – 7.8 by volume
Bitterness:	25 - 70 IBU

MODIFICATION 2022

Description

Bottom fermented

Colour: straw yellow to black

Bitterness: high

Hop aroma: intense

The overall aroma should be characterized by hop aroma; the origin of the hop varieties has no restriction. The use of hops in the cold part of the brewery ("dry hopped") is expressly desired

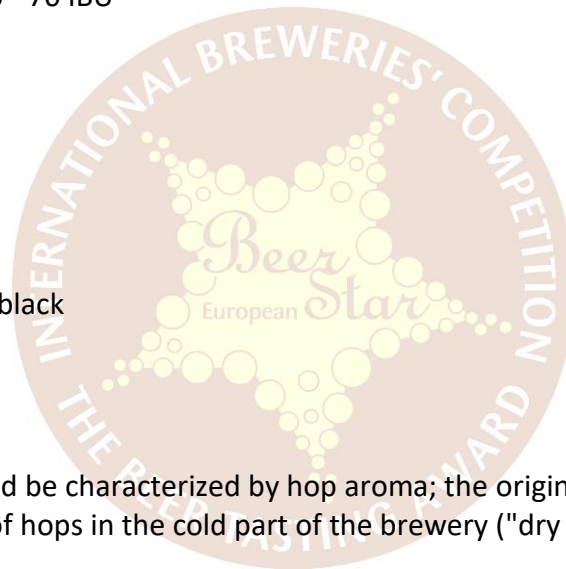

Degree of fermentation: high

Body: slim to medium

Low residual sweetness

No Diacetyl

Turbidity allowed

11 German-Style Export

Analytics

Original gravity:	12.0 - 14.0 °Plato
Apparent extract:	2.3 - 3.5 °Plato
Alcohol:	4.0 - 4.8 % by weight 5.0 - 6.7 % by volume
Bitterness:	18 - 30 IBU

Description

Bottom fermented

Colour: straw up to deep golden

Hop bitterness: medium

Hop flavour and aroma: noticeable but low

Malt character: slightly sweet, no caramel

Body: medium

No fruity esters or Diacetyl

Beer is filtered

No chill-haze

12 German-Style Dunkel

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.5 - 4.7 % by weight 4.5 - 5.9 % by volume
Bitterness:	15 - 25 IBU
Colour:	40 - 60 EBC

Description

Bottom fermented

Colour: medium up to dark brown

Malt aroma: strong

Hop bitterness: clean and balanced

A classic European-Style dark should have chocolate-like, bread- or biscuit-like aroma caused by the use of Munich dark malt. A small percentage of chocolate or roast malts may be used

Hop flavour and aroma: low but noticeable

No fruity esters or Diacetyl

Beer is filtered

No chill-haze

13 German-Style Schwarzbier

Analytics

Original gravity:	11.0 - 13.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.5 - 4.7 % by weight 4.5 - 5.9 % by volume
Bitterness:	22 - 32 IBU
Colour:	> 60 EBC

Description

Bottom fermented

Colour: dark brown up to almost black

Aroma: light to medium roasted notes desired, as well as light coffee-like aromas and licorice notes

Malt flavour and aroma: clean, low sweetness

Hop bitterness: low up to medium

Hop flavour and aroma: low but noticeable

No fruity esters or Diacetyl notes

14 Bohemian-Style Dark Lager

Analytics

Original gravity:	10,0 – 13,0 °Plato
Apparent extract:	2.0 - 4.5 °Plato
Alcohol:	3.1 - 4.4 % by weight 4.0 - 5.8 % by volume
Bitterness:	18 - 30 IBU
Colour:	> 60 EBC

Typical Examples:

- Bohemian-Style Dark
- Tmavé Ležák

Description

Bottom fermented

Colour: almost black up to deep black

Malt: roast malt with the characteristic bitterness

Malt flavour and aroma: clean, slightly sweet

Hop bitterness: low to medium

Hop flavour and aroma: slightly noticeable

No fruity esters

Diacetyl: low content acceptable

15 German-Style Heller Bock

Analytics

Typical Examples:

- Maibock

Original gravity:	16.0 - 17.9 °Plato
Apparent extract:	3.0 - 5.5 °Plato
Alcohol:	5.2 - 6.4 % by weight 6.2 - 8.0 % by volume
Colour:	< 29 EBC

Description

Bottom fermented

Colour: straw yellow up to light brown

Maibock should be registered in this category

Malt aroma and flavour: noticeable

Body: full to medium, high alcohol content

Hop bitterness: medium

Hop flavour and aroma: low to medium

Fruity esters: low

Diacetyl: not noticeable or very low

Please note the colour- and alcohol ranges for registration!

16 German-Style Dunkler Bock

Analytics

Original gravity:	16.0 - 17.9 °Plato
Apparent extract:	3.5 - 6.0 °Plato
Alcohol:	5.0 - 6.4 % by weight 6.2 - 8.0 % by volume
Colour:	≥ 30 EBC

Description

Bottom fermented

Colour: light brown up to black

Malt character: dominant but not too sweet

Full body

No astringent roast malt character

High alcohol content

Hop bitterness and flavour: rather low

Fruity esters: low to medium

Please note the colour and alcohol ranges for registration!

17 German-Style Heller Doppelbock

Analytics

Original gravity:	18.0 - 22.0 °Plato
Apparent extract:	3.5 - 5.5 °Plato
Alcohol:	5.6 - 6.8 % by weight 6.5 - 10.0 % by volume
Colour:	< 29 EBC

Description

Bottom fermented

Colour: straw yellow up to light brown

Malt character: dominant with distinct body

Strong alcohol aroma

Hop bitterness and flavour: medium

Please note the colour and alcohol ranges for registration!

18 German-Style Dunkler Doppelbock

Analytics

Original gravity:	18.0 - 22.0 °Plato
Apparent extract:	3.5 - 5.5 °Plato
Alcohol:	5.6 - 6.8 % by weight 6.5 - 10.0 % by volume
Colour:	≥ 30 EBC

Description

Bottom fermented

Colour: light brown up to black

Malt character: dominant with sweet notes

No astringent roasted malt character

Full body

Strong alcohol aroma

Hop bitterness and flavour: slightly pronounced

Fruity esters: low to medium

Please note the colour and alcohol ranges for registration!

19 *Belgian-Style Blond Ale*

Analytics

Original gravity:	11.0 - 15.0 °Plato
Apparent extract:	2.0 - 3.5 °Plato
Alcohol:	3.5 - 5.0 % by weight 4.5 - 6.5 % by volume
Bitterness:	15 - 40 IBU

Description

Top fermented

Colour: Light up to deep golden

Hop bitterness, flavour and aroma: low but noticeable

Body: light to medium, slight malt aroma

Low to medium fruity esters

Low levels of phenolic notes by means of fermentation by-products are allowed but not mandatory

Low caramel flavour allowed

No Diacetyl

Light turbidity allowed due to bottle fermentation

20 Belgian-Style Strong Blond Ale

Analytics

Original gravity:	15.0 - 23.0 °Plato
Apparent extract:	2.0 - 5.0 °Plato
Alcohol:	> 5.0 % by weight > 6.5 % by volume
Colour:	< 29 EBC
Bitterness:	20 - 50 IBU

MODIFICATION 2022

Description

Top fermented

Colour: straw yellow to light brown amber

Hop bitterness and hop aroma: slight to pronounced

Body and character: rather slender body in relation to the original wort and alcohol content. The alcohol content is high, but tends not to be in the front and the character of the beer should remain rather elegant in relation to the high original gravity.

Recognizable and multi-layered fruity flavours, which can come from both the hops and the used Belgian ale yeast.

Low to moderate levels of phenolic notes by fermentation by-products are allowed.

Herbal additions such as coriander are sometimes used, but are not traditionally common in this style of beer and therefore, if present, should not dominate.

Medium malty character

No Diacetyl

21 *Belgian-Style Strong Dark Ale*

Analytics

Original gravity:	15.0 – 25.0 °Plato
Apparent extract:	2.5 - 6.0 °Plato
Alcohol:	> 5.0 % by weight > 6.5 % by volume
Colour:	≥ 30 EBC
Bitterness:	15 - 50 IBU

Description

Top fermented

Colour: dark amber to black

Hop bitterness and flavour: low to high

Body and character: pronounced and full bodied with a noticeably high alcohol content. A distinct sweet malt aroma with caramel, chocolate and roasted aromas is just as typical as aromas of dried fruit. Typical yeast aromatics from Belgian yeast strains should be recognizable. Intense and alcohol-aromatic finish.

Low levels of phenolic notes from fermentation by-products are allowed

No or only very little Diacetyl notes

22 *Belgian-Style Dubbel*

Analytics

Original gravity:	13.0 - 18.0 °Plato
Apparent extract:	2.5 - 4.0 °Plato
Alcohol:	5.0 - 6.7 % by weight 6.0 - 8.0 % by volume
Bitterness:	20 - 40 IBU

Description

Top fermented

Colour: dark-amber to dark-brown

Medium to full body

Malt character: sweet, nutty, chocolate-like and roasted notes

Can have a dry finish, or be slightly sweet, but the sweetness should not be cloying

Hop aroma: medium

Bitterness: medium

Hop flavour: low

Diacetyl: low or absent

Low to Medium to high levels of fruity esters (e.g. banana)

Low to medium levels of phenolic notes by means of fermentation by-products are acceptable but not mandatory

Dense and mousse-like foam

Traditional Dubbels are bottle conditioned and may have a slight yeast haze

23 *Belgian-Style Tripel*

Analytics

Original gravity:	16.0 - 22.0 °Plato
Apparent extract:	2.5 - 4.0 °Plato
Alcohol:	5.5 - 8.0 % by weight 7.0 - 10.0 % by volume
Bitterness:	20 - 40 IBU

MODIFICATION 2022

Description

Top fermented

Colour: light yellow up to amber

Complex character

A mild yeast by-product spicyness with for example clove-like character (4-Vinyl-Guajacol) is acceptable but not mandatory

Herbal additions such as coriander are sometimes used, but are not traditionally common in this style of beer and therefore should not dominate.

A marked but balanced ester profile is part of the style

A warming feeling and some sweetness might be present but not overwhelming. The finish can be quite dry. The drinkability is surprisingly high.

No roasted malt character, no Diacetyl

Hop aroma is noticeable and should be of the noble type; hop bitterness medium

Dense and mousse-like foam

Traditional Tripels are bottle conditioned and may have a slight yeast haze

24 *Sour and Fruit Sour Beer*

Analytics

Original gravity:	5.0 - 12.0 °Plato
Apparent extract:	1.5 - 3.0 °Plato
Alcohol:	2.0 - 4.5 % by weight 2.5 - 5.5 % by volume
Bitterness:	5 - 25 IBU

Typical Examples:

- *Catharina Sour*
- *Berliner Weiße*
- *Gose*
- *Lichtenhainer*
- *Broyhan*

Description

Bottom or top fermented

Colour: light yellow to dark brown, or according to the used fruit

If the beers were stored in wooden barrels, the overall flavour should not be affected by the wood.

Pronounced but balanced acid, either lactic acid or citric acid character; Acetic acid is allowed in low quantity, if it is integrated harmoniously in the overall flavour.

Overtly, unbalanced sourness is a fault

A characteristic horse smell (like wet horse blanket) of *Brettanomyces* yeast may be present in small quantity, if harmoniously integrated.

When fruit is used, it should be largely fermented and should be in balance with the beer character.

The beers are relatively dry, a slight sweetness can round off the acid character.

Hop Bitterness: very low to medium

No Diacetyl

Turbidity is allowed

Typical representatives of "Sour Beer" are beers that have been fermented using lactic acid bacteria

Note: Sour Beers with recognizable wood barrel aging aromas should be submitted in the category "Wood and Barrel Aged Sour Beer". Classic Belgian Lambic, Geuze, and Fruit Geuze should be submitted in the designated category "Belgian-Style Oude Geuze and Oude Lambic".

In order to facilitate sensory evaluation, it is necessary for the brewery to provide additional information about the beer when submitting the entry:

- **Indication of the type of beer**

25 Fruit Beer

Analytics

Original gravity:	8.0 - 20.0 °Plato
Apparent extract:	1.5 - 4.5 °Plato
Alcohol:	2.8 - 8.0 % by weight 3.5 - 10.0 % by volume
Bitterness:	5 - 35 IBU

Typical Examples:

- Fruit Geuze (**not Oude Fruit Geuze**)

Description

Bottom or top fermented

Colour: depending on the fruit addition

The beers of this category can be brewed with the addition of any kind of fruit or fruit juice. The fruit content should be largely fermented.

The beer and fruit should form a harmonious unit, whereby as well the respective character of the underlying beer style as a balanced and natural fruit character should be recognizable.

The fruit aroma should not seem artificial.

Overtly, unbalanced sourness is a fault

The hop character should not cover the fruit character.

No Diacetyl flavour

Turbidity is allowed

All Fruit Geuze which do not have the suffix “Oude” in their name and are therefore sweet/sour balanced and show less or now Brettanomyces character are to be submitted in this category.

Fruit beers with a pronounced milk-sour character should be submitted in the “Fruit Sour Beer” category.

Beer mixed with soft drinks or fruit juice are NOT included in this category.

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Type of beer**
- **Type of fruit used during brewing**

26 Wood and Barrel Aged Sour Beer

Analytics

Original gravity:	> 11.0 °Plato
Apparent extract:	> 2.0 °Plato
Alcohol:	> 4.0 % by weight > 5.0 % by volume

Typical Examples:

- *Flemish or Flanders Red*
- *Oude Bruin*
- *Barrel Aged Fruit Sour*

Description

MODIFICATION 2022

Beers which have been aged in a wooden barrel over a longer period of time, or were matured in contact with wood, and therefore possess sensible sensory characteristics originating from the wood with which it was in contact (e.g. aromas reminiscent of vanilla, coconut, tobacco, caramel, honey, black tea or earthy aromas)

Due to the special ageing process, these beers can also have a very low CO₂ content; beers without foam can therefore also be regarded as typical of this type

Colour: light yellow to dark brown

Pronounced acidity, either of a lactic acid or citric acid character (acetic acid is allowed in small amounts)

Overtly, unbalanced sourness is a fault

Hop bitterness is very low

No Diacetyl / Turbidity is allowed

A characteristic horse smell (like wet horse blanket) of *Brettanomyces* is allowed

The beers can be of a dry nature and their acidic character rounded off by a slight to medium sweetness

Fruity-ester aromas and slight to clear traces of their barrel fermentation are just as typical of these types of beer as aromas reminiscent of tobacco, sherry and vanilla

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Type of beer before being aged in barrels**
- **Type of wood used (new or old, oak or other wood type)**
- **The product that was stored in the barrel before**
- **Added Fruits**

27 Italian Grape Ale (IGA)

Analytics

Original gravity:	7.0 - 25.0 °Plato
Apparent extract:	0.5 - 7.0 °Plato
Alcohol:	2.5 - 11.5 % by weight 3.1 – 14.5 % by volume
Bitterness:	6 - 35 IBU

NEW CATEGORY 2022

Description

The grape content of this hybrid of malt and grapes can be up to 40% of the total extract. Both grapes and grape must (the latter also partially boiled down) can be used at various stages of the brewing process.

The objective of this beer style is to achieve a balance between the wine and beer character. The wide variety of raw material selection and brewing techniques result in a very broad sensory spectrum in this beer style.

The grape varieties used (red or white) should be recognizable in their typicality.

Both classic brewing yeasts (top or bottom fermenting) or/and wild wine yeasts as well as acid-forming bacteria are permitted during fermentation. Accordingly, acid notes as well as harmoniously integrated Brettanomyces aromas are possible.

Barrel-aged versions may show typical aromas accordingly.

Note: In order to enable the tasters to assess the typicality of the grape variety(ies) used, as well as the underlying beer character, appropriate information should be provided by the sender in this regard.

In order to facilitate the sensory evaluation, it is necessary for the brewery to provide additional information on the beer when registering:

- **Indication of beer type**

28 Belgian-Style Oude Geuze and Oude Lambic

Analytcs

Original gravity:	9.0 – 16.0 °Plato
Apparent extract:	1.0 - 3.5 °Plato
Alcohol:	2.8 - 6.7 % by weight 4.0 - 8.0 % % by volume
Bitterness:	5 - 20 IBU

Typical Examples:

- Oude Fruit Lambic
- Oude Lambic
- Oude Geuze

Description

Spontaneous fermentation

Colour: bright yellow to amber, or according to the fruit used

The beers of this category should be made with traditional spontaneous fermentation and aged in the old wooden barrels and therefore represent complex and typical lactic acid and Brettanomyces flavours. Acetic acid may also be detectable in low concentration. Geuze is traditionally bottle conditioned and can have a relatively high concentration of carbon dioxide. Lambic, on the other hand, can be bottled with very low carbon dioxide levels or, preferably, none.

Traditional Fruit-Lambic Geuze is fermented or and matured with real fruits. Therefore, the fruit sugars should be largely fermented and only very little residual sweetness should be present, if any. The respective fruit aroma should be harmonious and recognizable.

Bitterness: very low

No or only low Diacetyl

Haze is common due to bottle fermentation

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Type of beer**
- **Type of fruit used during brewing, if applicable**

29 Belgian-Style Saison

Analytics

Gravity:	7,0 - 16,0 °Plato
Extract apparent:	1,0 - 2,5 °Plato
Alcohol:	2,0 - 5,1 % by weight 2,5 - 6,5 % by volume
Bitterness:	10 - 40 IBU

Typical Examples:

- Farmhouse Ale
- Traditional Saison

Description

Colour: light yellow to orange

Turbidity allowed, the beers become a second fermentation in the bottle

Saison-yeasts created fruit aromas, especially citrus-like notes are well perceivable

Spices, like coriander or pepper could be used, their aromas should not be dominant

A characteristic horse smell (similar to a wet horse's blanket) of Brettanomyces yeasts can be present in small amounts

Earthy and cellar-like aromas are also permitted

Very sparkling and refreshing in the drink with a dry finish

Slim to medium body

Light to medium bitterness, only slightly noticeable hop aromas

Mild but noticeable acidity in the taste promotes the refreshing character of the beer

No Diacetyl

MODIFICATION 2022

30 *New-Style Saison*

Analytics

Gravity:	10,0 - 20,0 °Plato
Extract apparent:	1,5 - 3,5 °Plato
Alcohol:	5,1 - 6,7 % by weight 4,7 - 8,5 % by volume
Bitterness:	20 - 60 IBU

MODIFICATION 2022

Description

Colour: light yellow to black

Turbidity allowed

Saison-yeasts created fruit aromas, especially citrus-like notes are well perceivable

Intense sparkling and refreshing drink with dry finish

In addition to the higher permitted alcohol content, New-Style Saisons, unlike traditional Belgian Saisons, may have one or more of the following sensory characteristics more pronounced:

1. Hop aromas and Hop bitterness
2. Brettanomyces aromas
3. Spice- and herb additions
4. Lactic acid

Despite of all allowed sensoric elements, the typical Saison character should be recognizable.

No Diacetyl

31 *Session Beer*

Analytics

Original gravity:	6.0 – 12.0 °Plato
Apparent extract:	1.5 - 3.0 °Plato
Alcohol:	2.0 - 3.8 by weight 2.0 - 4.9 by volume
Bitterness:	10 - 60 IBU

Typical Examples:

- *Kölsch-Style Ale*
- *Session Lager*
- *Session India Pale Ale*
- *Session Pale Ale*

Description

Bottom and top fermented

Colour: Straw yellow to dark

Body: low to medium body, light character

Malt character: low to medium

Bitterness: low to high

Hop aroma: low to high

A distinctive drinkability is typical of this category. This is achieved by brewing the beer with lower gravity or by using technology and/or recipe to match a light and easy drinking character.

No distinct Diacetyl notes

Note: "German-Style Leichtbier", "South German-Style Leichtes Weizen" and "Bohemian-Style Session Lager" must be entered in their respective categories.

In order to facilitate sensory evaluation, it is necessary for the brewery to provide additional information about the beer upon entry:

Indication of the beer type

32 *Belgian-Style Witbier*

Analytics

Original gravity:	9,0 - 14.0 °Plato
Apparent extract:	1.5 - 3.5 °Plato
Alcohol:	3.0 - 4.2 % by weight 3.5 – 5.2 % by volume
Bitterness:	6 - 20 IBU

Description

Top fermented

Colour: very pale bright up to bright yellow

Haze should be present due to the use of raw wheat and secondary fermentation

Raw materials: malted barley, unmalted wheat and (optionally) unmalted oats

The wheat flavour should be clearly noticeable

Since the 1960's, orange-peel and coriander are added to obtain a balanced flavour but a variation of these two additives (e.g., other citrus fruits peels or other spices) is also allowed as long as the typical Witbier character is recognizable. However, Witbier has traditionally been made without spices, so, an unspiced version showcasing the wheat flavours and, possibly, some lactic acid tones, is totally acceptable.

Light up to medium fruity and spicy aroma

Phenolic aromas are classically encountered but should be mild and in balance

Body: low to medium with a certain creaminess

Bitterness: low Hop aroma: hardly noticeable

Taste: slightly sour

No Diacetyl

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Ingredients used during brewing**

33 *Traditional Style Pale Ale*

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.5 - 4.7 % by weight 4.5 - 6.5 % by volume
Bitterness:	20 - 40 IBU

Description

Colour: gold to copper

Hop bitterness, -flavour and aroma: Medium to high, however, not too dominant

Usage of small quantities of traditional European (English, German or Czech) aroma hops in the cold part of the brewery ("dry hopped") is allowed

Body: Medium

Malt flavour and aroma: Low to medium, a slight caramel character is allowed

Low to medium fruity ester notes

Chill-haze acceptable in case of cold serving temperatures

Very small quantities of Diacetyl are allowed

Turbidity allowed

34 *New-Style Pale Ale*

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0°Plato
Alcohol:	3.5 - 4.7 % by weight 4.5 - 6.5 % by volume
Bitterness:	25 - 45 IBU

Description

Colour: Gold to copper

Hop bitterness, -flavour and aroma: Medium to high, however, not too dominant

Usage of small quantities of "modern" aroma hops (America, overseas, however, also German Flavour Hops) in the cold part of the brewery ("dry hopped") is allowed

Slightly flowery, fruity, citrus-type hops aromas should be identifiable

Body: Medium

Malt flavour and aroma: Low to medium, a small caramel character is allowed

Low to medium fruity ester notes

No Diacetyl

Turbidity allowed

35 *Traditional India Pale Ale*

Analytics

Original gravity:	11.0 - 17.0 °Plato
Apparent extract:	3.0 - 4.5 °Plato
Alcohol	4.0 - 6.0 % by weight 4.5 - 7.5 % by volume
Bitterness:	> 35 IBU

Description

Top fermented

Colour: light gold up to dark copper

Intensive hop bitterness

Traditional European aroma hops (e.g. English, German or Czech) are added in the cold part of the brewery ("dry hopped")

Hay-like to strong aroma of hops

Malt character and body: medium

Medium hints of fruity ester

Very small amounts of Diacetyl are allowed

Chill-haze acceptable in case of cold serving temperatures

Turbidity allowed

36 *New-Style India Pale Ale*

Analytics

Original gravity:	12.0 - 17.0 °Plato
Apparent extract:	3.0 - 4.5 °Plato
Alcohol	4.0 - 6.0 % by weight 5.0 - 7.5 % by volume
Bitterness:	> 50 IBU

Description

Top fermented

Colour: light gold up to dark copper

Intensive hop bitterness

"Modern" aroma hops (e.g. USA, New Zealand, Australia, although also New German Flavour Hops) are added in the cold part of the brewery ("dry hopped")

Floral, fruity, citric, resin-like to strong aroma of hops

Malt character and body: medium

Medium to quite strong hints of fruity ester

No Diacetyl

Turbidity allowed

37 Specialty India Pale Ale

Analytics

Original gravity:	12.0 - 17.0 °Plato
Apparent extract:	1.0 - 4.5 °Plato
Alcohol	4.0 - 6.0 % by weight 5.0 - 7.5 % by volume
Bitterness:	> 50 IBU

Typical Examples:

- *New England-Style India Pale Ale*
- *Hazy India Pale Ale*
- *Juicy India Pale Ale*
- *Black India Pale Ale*
- *Milkshake India Pale Ale*
- *Kveik India Pale Ale*
- *Brut oder Dry India Pale Ale*
- *Glitter India Pale Ale*

Description

Based on American IPAs, numerous new interpretations are created, which clearly stand out in terms of sensory.

The differences to classical IPAs can appear visually as well as sensory.

Typical examples:

New England India Pale Ale (NEIPA): An orange-coloured milky cloudiness paired with a pronounced fruity sensation and a rather creamy mouthfeel.

Black India Pale Ale: very dark to black colour and dark roasted malt aromas and flavours.

Brut / Dry India Pale Ale: The very dry character with no recognizable sweetness should put the focus on fruitiness.

Glitter India Pale Ale: A metallic look is achieved by adding food-safe glitter particles.

Despite all the optics in this category, a good representative should primarily convince with a pronounced sensory harmony.

Turbidity allowed

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Type of beer**

38 Imperial India Pale Ale

Analytics

Original gravity:	> 17.0 °Plato
Apparent extract:	4.0 - 5.0 °Plato
Alcohol:	> 5.5 % by weight > 7.0 % by volume
Bitterness:	> 50 IBU

Description

Top fermented

Colour: deep golden up to dark copper

Intense hop bitterness, -flavour and -aroma

Use of aroma hops in the cold part of the brewery ("dry hopped")

Flavour impression: high alcohol content

Despite of the intense hop character, a typical Imperial IPA shows a balanced fruity aroma (caused by higher alcohols and esters) with a medium up to intensive malt character

Distinct and full body

No Diacetyl

Turbidity allowed

39 English-Style Bitter

Analytics

Original gravity:	8.5.0 - 14.9 °Plato
Apparent extract:	1.5 – 4.0 °Plato
Alcohol:	2.4 – 4.6 % by weight 3.5 – 6.5 % by volume
Bitterness:	20 - 45 IBU

Typical Examples:

- *Ordinary Bitter*
- *Best Bitter*
- *Special Bitter*
- *Extra-Special Bitter*

Description

Top fermented

Colour: golden up to copper

Bitterness: medium to high

Body: low to medium

Low to medium residual malt sweetness

Smooth notes of Aroma Hops

Fruity esters and a very low Diacetyl content are acceptable

Turbidity allowed

40 *English-Style Golden Ale*

Analytics

Original gravity:	8.0 - 12.5 °Plato
Apparent extract:	1.5 - 3.0 °Plato
Alcohol:	2.2 - 4.4 % by weight 2.8 - 5.5 % by volume
Bitterness:	10 - 30 IBU

Typical Examples:

- *Summer Ale*
- *Golden Ale*
- *American Blonde Ale*

Description

Top fermented

Colour: light straw yellow up to dark golden

Light malt character, sometimes with biscuit note

Bitterness: low to medium

Hop aroma slightly pronounced

After-taste: fresh and dry

Fruity esters are acceptable at low levels

Diacetyl and sulphur notes should not be noticeable

These beers are clean and have a thirst-quenching character

Turbidity allowed

41 Red Ale

Analytik

Original gravity:	10,0 - 15,0 °Plato
Apparent extract:	1,5 - 4,6 ° Plato
Alkohol:	3,3 - 5,2 % by weight 4,5 - 6,5 % by volume
Bitterness:	15 - 40 IBU
Colour:	16 - 36 EBC

Typical Examples:

- *Irish Red Ale*
- *American Red Ale*

Description

Top fermented

Colour: amber to red-brown

Low to middle hop bitterness

Middle to distinct malt aroma with biscuit- or caramellike notes

Low to middle distinct hop aromas

body: middle with sweet maltiness

low fruity estery notes allowed

very low amount of diacetyl is allowed if it fits to the malt body

turbidity allowed

42 English-Style Strong Ale

Analytics

Original gravity: 14,5 – 21,9 °Plato
Apparent extract: 3,6 – 7,6 °Plato
Alcohol: 5,0 – 7,2 % by weight
6,3 – 9.1 % by volume

Bitterness: 30 – 65 IBU

Colour: 10 – 60 EBC

Typical Examples:

- *Wee Heavy*
- *Scotch Ale*
- *Old Ale*
- *Strong Golden Ale*

Description

Top fermentation

Colour: gold-coloured to brown

Character: bulky body with dominant sweet maltiness and pronounced malt aromas. Aromas of nuts, caramel and toffee are just as typical as a clearly recognizable but balanced alcohol aroma.

Roasted malt flavours should be absent or only slightly pronounced.

Depending on the style, fruity ester aromas of the yeast or due to a longer storage can support the malt character.

Hop aroma rather low, hop bitterness low to medium, but always harmoniously integrated.

Diacetyl: slight expression allowed

Traditional Scotch Ales can have a peat-smoke character

Turbidity allowed

43 English-Style Porter

Analytics

Original gravity:	10.0 - 15.0 °Plato
Apparent extract:	1.5 - 4.0 °Plato
Alcohol:	3.5 - 5.2 % by weight 4.5 - 6.5 % by volume
Bitterness:	20 - 40 IBU

Typical Examples:

- *Brown Porter*
- *Mild Porter*
- *Robust Porter*

Description

Top Fermented

Colour: medium brown to black

Roast malt but no roast barley flavour

Malt aroma: low to medium sweetness up to some bitterness (roast malt) with no burnt or charcoal flavour

Medium up to full body

Medium up to high hop bitterness

Light up to medium hop aroma

Balanced fruity esters with respect to roast malt and hop bitterness

44 Strong Porter

Analytics

Gravity:	≥ 15,0 °Plato
Extract apparent:	3.0 - 7.5 °Plato
Alcohol:	5.2 - 9.5 % by weight 6.5 - 12.0 % by volume
Bitterness:	20 - 40 IBU

Typische Vertreter:

- *Baltic-Style Porter*
- *Imperial Porter*

Description

Top-or bottom fermented

Colour: deep ruby/garnet red up to black

Delicate scents and tastes hinting at caramel, liquorice, cocoa, chocolate, roasted malt and brown sugar

The roasted malt character should not affect the bitterness or be too stringent

A slight scent of smoke is allowed.

Top-fermented, fruity ale aromas are undesirable

Hop aromas in the background; a delicate floral scent of hops is allowed

Due to the high original gravity, the accent is on alcohol aromas

Bitterness: slight to medium

Body: medium to full-bodied underlain by a slight to medium malt sweetness

No Diacetyl

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Indication of the type of beer**

45 *Stout*

Analytics

Original gravity:	9.5 - 16.0 °Plato
Apparent extract:	2.0 – 4.5 °Plato
Alcohol:	3.2 - 5.2 % by weight 4.0 - 7.0 % by volume
Bitterness:	25 - 60 IBU

Typical Examples:

- *Dry Stout*
- *Oatmeal Stout*
- *Extra Stout*
- *Foreign Stout*

Description

Top Fermented

Colour: deep black (opaque black)

First taste: malty, coffee or bitter chocolate-like

After taste: characteristic roasted aroma by means of using roasted malt (which often dominates the flavour but also eliminate other impressions)

Oat flakes as ingredient are possible

Depending on the Stout variant, the characteristic can range from dry-bitter to creamy-sweet

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Indication of the type of beer**

MODIFICATION 2022

46 *Flavoured or Pastry Stout*

Analytics

Original gravity:	12.0 - 25.0 °Plato
Apparent extract:	3.0 - 7.5 °Plato
Alcohol:	4.0 - 9.5 % by weight 5.0 - 12.0 % by volume
Bitterness:	10 - 40 IBU

Typical Examples:

- *Milk Stout*
- *Cream Stout*
- *Pastry Stout*
- *Coffee Stout*
- *Chocolate Stout*

Description

Top fermented

Color: dark brown to deep black

Aroma depending on the respective additions

Mostly very aroma-intensive, often sweetish and creamy with high viscosity and high full-bodiedness

Roasted aroma varies in intensity

Flavoring through the addition of, for example, coffee, cocoa or chocolate, as well as all ingredients commonly used for desserts, cakes or pastries.

Often addition of lactose to increase the residual sweetness.

The hops should provide a balance to the sweetness without being too prominent

For better sensorial rating it is necessary for the brewery to give additional information at the registration:

- **Beer style**
- **All added aromas or other additives**

NEW CATEGORY 2022

47 Imperial Stout

Analytics

Original gravity:	16.0 - 25.0 °Plato
Apparent extract:	4.0 - 7.5 °Plato
Alcohol:	5.5 - 9.5 % by weight 7.0 - 12.0 % by volume
Bitterness:	> 40 IBU

Description

Top Fermented

Colour: deep black

High alcohol content

Malt flavour and aroma: high

Hops and fruity esters: high levels

Bitterness: medium to high

Roast malt and bitter aromas should not fully cover the beer character

Hop aroma: smooth to floral, citrus or herbal

Diacetyl: very low

Imperial Stouts aged in wood must be submitted in Category **Wood and Barrel Aged Strong Beer**

Analytics

Original gravity:	11.0 - 12.5 °Plato
Apparent extract:	2.0 - 3.0 °Plato
Alcohol:	3.8 - 4.2 % by weight 4.8 - 5.2 % by volume
Bitterness:	20 - 45 IBU

Description

Top fermented

Colour: copper to brown

Body: medium, malty flavour

Hop aroma and flavour: low to high

Altbier can be significantly hopped

The overall impression is clean, crisp, full-bodied, often with a dry finish

Low to medium fruity esters

No Diacetyl

Turbidity allowed

49 *South German-Style Leichtes Weizen*

Analytics

Original gravity:	6.0 – 9.8 °Plato
Apparent extract:	1.0 - 2.0 °Plato
Alcohol:	2.0 - 3.0 % by weight 2.5 - 3.5 % by volume
Bitterness:	6 - 16 IBU

Description

Top fermented

Lower original gravity and lower alcohol content than Hefeweizen

The phenolic and ester aromas (typical for Hefeweizen) are perceptible but less strongly marked than for Hefeweizen

Hop aroma and flavour: not noticeable

The flavour profile is less noticeable due to the lower alcohol content

Body: lower than Hefeweizen

No Diacetyl

Yeast turbidity possible

50 South German-Style Hefeweizen Hell

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.7 - 4.7 % by weight 4.6 - 5.9 % by volume
Bitterness:	10 - 20 IBU
Colour:	< 18 EBC

Description

Top fermented

Colour: very pale to orange

Aroma and flavour: fruity and phenolic

The phenolic characteristics are often described as clove- or nutmeg-like and they may also be smoky or even vanilla-like

The wheat malt percentage is at least 50%

Hopping rates are quite low

Hop flavour and aroma are not noticeable

Hefeweizen is high attenuated and shows a high carbon dioxide content

Noticeable taste of yeast

Full body

No Diacetyl

Yeast turbidity possible

Please note the colour ranges for registration!

51 *South German-Style Hefeweizen Bernsteinfarben*

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.7 - 4.7 % by weight 4.6 - 5.9 % by volume
Bitterness:	10 - 20 IBU
Colour:	18 - 29 EBC

Description

Top fermented

Colour: amber notes

Aroma and taste: fruity and phenolic, slight caramel note

Taste: pleasant malt sweetness with slight caramel or bread character

The phenolic characteristics are often described as clove- or nutmeg-like and can be smoky or even vanilla-like

The wheat malt percentage is at least 50%, hopping rates are quite low

Hop flavour and aroma are not noticeable

Hefeweizen is high attenuated and shows a high carbon dioxide content

Full body

No Diacetyl

Yeast turbidity possible

Please note the colour ranges for registration!

52 South German-Style Hefeweizen Dunkel

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.7 - 4.7 % by weight 4.6 - 5.9 % by volume
Bitterness:	10 - 20 IBU
Colour:	≥ 30 EBC

Description

Top fermented

Colour: light brown to black

Due to the use of dark-coloured malts the beer shows a distinct sweet maltiness and caramel or bread character

Estery and phenolic elements should be evident but subdued

Hefeweizen is high attenuated and shows a very high carbon dioxide content

The percentage of wheat malt is at least 50 %

Full body

Hop bitterness: low

Hop aroma not noticeable

No Diacetyl

Yeast turbidity possible

Please note the colour ranges for registration!

53 South German-Style Kristallweizen

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.7 - 4.7 % by weight 4.6 - 5.9 % by volume
Bitterness:	10 - 20 IBU

Description

Top fermented

Colour: light to dark yellow

Aroma and taste: slightly fruity and phenolic

The phenolic characteristics are often described as clove- or nutmeg-like and can be smoky or even vanilla-like

The percentage of wheat malt is at least 50 %

Hop rates are quite low

Hop flavour and aroma are not noticeable

Well attenuated and highly carbonated

Contains no more yeast, so that almost no yeasty taste is noticeable

No chill-haze

No Diacetyl

Beer is filtered

54 *South German-Style Weizenbock Hell*

Analytics

Original gravity:	16.0 - 22.0 °Plato
Apparent extract:	4.0 - 7.0 °Plato
Alcohol:	5.5 - 7.5 % by weight 6.0 - 9.5 % by volume
Colour:	< 30 EBC

Description

Top fermented

Colour: golden up to amber

The malt sweetness is balanced with a clove-like phenolic and fruity-estery banana notes

Hop flavour and aroma: low to medium

Body: medium to full

Carbon dioxide: high

No Diacetyl

Yeast turbidity possible

Please note the colour ranges for registration!

55 *South German-Style Weizenbock Dunkel*

Analytics

Original gravity:	16.0 - 22.0 °Plato
Apparent extract:	4.0 - 7.0 °Plato
Alcohol:	5.5 - 7.5 % by weight 6.0 - 9.5 % by volume
Colour:	≥ 30 EBC

Description

Top fermented

Colour: light brown to black

The sweetness of malt is balanced with a clove-like phenolic and fruity-estery banana notes

Hop flavour and aroma: low to medium

Carbon dioxide: high

Full-bodied

The flavour, but not the aroma, should show a mild roasted malt character

No Diacetyl

Yeast turbidity possible

Please note the colour ranges for registration!

56 *New-Style Hefeweizen*

Analytics

Original gravity:	11.0 - 22.0 °Plato
Apparent extract:	2.0 – 7.0 °Plato
Alcohol:	3.7 - 7.5 % by weight
	4.6 – 9.5 % by volume

Description

Top fermentation

Colour: straw yellow up to dark brown

Intense hop bitterness

Use of both, traditional European (e.g., English, German or Czech) and "modern" flavour hops (e.g., USA, New Zealand, Australia, but also new German flavour hops) could be used in the cold part of the brewery ("dry hopped")

Distinct hop characteristics: Depending on the hop varieties as well fruity, citrusy, floral or resinous aroma are possible

The malt sweetness is balanced by a clove-like, phenolic and fruity banana note

Body: light to full-bodied

Carbon dioxide: high

No Diacetyl

This beer may have a yeast turbidity

57 *Smoke Beer*

Analytics

Original gravity:	11.0 - 15.9 °Plato
Apparent extract:	2.5 - 4.5 °Plato
Alcohol:	3.6 - 5.4 % by weight 4.5 - 6.5 % by volume
Bitterness:	20 - 35 IBU

Typical Examples:

- *Smoke Porter*
- *Smoke Stout*
- *Smoke Weizen (Rauchweizen)*

Description

Bottom or top fermented

In this category, both lagers and ales with low to high smoke flavour are permitted. Smoke beer variants of other styles such as Smoke Porter or Smoke Weizen are allowed

A smoke aroma must be clearly recognizable.

The taste notes of malt, hops and smoky flavour should be balanced. Especially with cold-hopped beers there should be a harmony between the hop and smoke flavours.

Bitterness: low to medium

Hop aroma: low to medium

No Diacetyl

Beers in this category can be filtered or unfiltered

Note: Smoke beers, which fit into the Franconian Rauchbier style are to be sent in the designated category "Smoke Beer Franconian-Style".

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Type of beer**

58 *Smoke Beer Franconian-Style*

Analytics

Original gravity:	11.0 - 13.9 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.7 - 5.0 % by weight 4.6 - 6.5 % by volume
Bitterness:	15 - 35 IBU

Description

Bottom fermented

In this category, only lagers with a recognizable up to a dominated smoke flavour should be submitted in accordance with the Franconian-Style Rauchbier.

Smoky smell and taste

The taste notes of malt, hops and smoky flavour should be balanced.

Sweet roasted malt notes recognizable.

Body: strong body and creamy texture due to well-embedded carbon dioxide

Low but noticeable fine hop flavour and low to medium bitterness.

No Diacetyl

59 Strong Smoke Beer

Analytics

Original gravity:	> 16.0 °Plato
Apparent extract:	3.5 - 6.5 °Plato
Alcohol:	> 5.4 % by weight > 6.5 % by volume
Bitterness:	20 - 45 IBU

Typical Examples:

- Rauchbock
- Imperial Smoke Ale
- Imperial Smoke Porter
- Imperial Smoke Stout

Description

Top- or bottom fermented

Smoky smell and taste

The taste of malt and hops and the smoky aroma should be well-balanced

Full-bodied with low or medium hop bitterness

Tastes slightly although noticeably of hops

Hints of fruity ester in top-fermented variants should not be too pronounced

No Diacetyl

Unfiltered Strong Smoke Beers have a slight to medium haziness

Please note the compliance with the specified alcohol content when registering!

In order to facilitate the sensory evaluation, it is necessary that the brewery provides additional information on the beer during registration:

- Indication of the beer type

60 *Herb and Spice Beer*

Analytics

Original gravity:	7.5 - 27.5 °Plato
Apparent extract:	1.5 - 7.5 °Plato
Alcohol:	2.0 - 9.5 % by weight 2.5 - 12.0 % by volume
Bitterness:	5 - 70 IBU

Description

Top- or bottom fermented

Herbs and/or spices are added during wort boiling, main or second fermentation

The hop character should not cover the spicy character

In case of addition of harsh or zesty fruits (e.g. juniper) the beer must be assigned to this category

The beer may be clear or cloudy

To allow accurate judging the brewer must provide additional information about entries in this category at registration:

- **List of added herbs and/or spices**
- **Type of beer**

61 Honey Beer

Analytics

Original gravity:	7.5 - 27.5 °Plato
Apparent extract:	1.5 - 7.5 °Plato
Alcohol:	2.0 - 9.5 % by weight 2.5 - 12.0 % by volume
Bitterness:	5 - 70 IBU

Description

Top- or bottom fermented

These beers (lagers or ales) are brewed with barley malt and honey

Brewed traditional or experimental

The flavour and aroma of honey should be noticeable but not cover the other ingredients

62 German-Style Kellerbier Hell

Analytics

Original gravity:	11.0 - 13.9 °Plato
Apparent extract:	1.5 - 3.0 °Plato
Alcohol:	3.8 - 4.4 % by weight 4.5 - 6.2 % by volume
Bitterness:	18 - 25 IBU
Colour:	< 30 EBC

Description

Bottom fermented

Colour: light yellow up to amber

Body: medium, malt typical

Traces of sulphur (caused by yeast) are noticeable

Certain types show an intensive hop flavour / character which, however, is balanced by malt to keep the typical characteristics

No caramel character

Hop bitterness: light to medium

Slight up to evident cellar turbidity

No fruity esters or Diacetyl

Please note the colour ranges to registration!

63 German-Style Kellerbier Dunkel

Analytics

Original gravity:	11.0 - 13.9 °Plato
Apparent extract:	1.5 - 3.0 °Plato
Alcohol:	3.8 - 4.4 % by weight 4.5 - 6.2 % by volume
Bitterness:	18 - 25 IBU
Colour:	≥ 40 EBC

MODIFICATION 2022

Description

Bottom fermented

Colour: light brown up to black

Malt aroma and flavour: strong

Hop bitterness: clean, balanced

The use of Munich dark malt should emphasize the chocolate-like, roasted malt or biscuit-like aroma

Small quantities of roasted or caramel malts may be used

Hop flavour and aroma: low but noticeable

Slight up to evident cellar turbidity

No fruity esters or Diacetyl

Please note the colour ranges for registration!

64 German-Style Kellerpils

Analytics

Original gravity:	11.0 - 13.9 °Plato
Apparent extract:	1.5 - 3.0 °Plato
Alcohol:	3.8 - 4.4 % by weight 4.5 - 6.2 % by volume
Bitterness:	25 - 50 IBU

Description

Bottom fermented

Colour: light yellow to golden

Hop bitterness: noticeable up to high

Hop flavour and aroma: moderate, quite noticeable

However, the aroma may not be characterised by the use of aromatic hops in the cold area ("dry hopped")

Attenuation degree: high

Body: medium

Flavour and aroma: residual sweetness

No fruity esters or Diacetyl

Dense and rich foam

Slight up to evident cellar turbidity

65 *Beer with alternative Cereals*

Analytics

Original gravity:	11.0 - 14.0 °Plato
Apparent extract:	2.0 - 4.0 °Plato
Alcohol:	3.9 - 4.9 % by weight 4.9 - 6.2 % by volume
Bitterness:	10 - 25 IBU

Description

Top or bottom fermented

The senses should be able to discern the particular taste nuances of the type(s) of cereals and "starch providers" used (rye, spelt, triticale, millet, rice, oats, corn, single-grain corn, emmer etc.)

Taste and smell: well-balanced malty aroma through to cereal-like

Hop aroma: slight to medium

Light to full-bodied

Hop bitterness: slight to medium

Unfiltered beers can be cloudy

A taste of yeast can be clearly distinguished in top-fermented beers because the beer often contains yeast

No Diacetyl

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Type of beer**
- **List of alternative cereals**

66 Vienna-Style Lager

Analytics

Original gravity:	11.0 - 13.0 °Plato
Apparent extract:	2.0 - 3.5 °Plato
Alcohol:	4.0 - 4.3 % by weight 4.8 - 5.6 % by volume
Bitterness:	15 - 25 IBU

Typical Examples:

- Red Lager
- Amber Lager

Description

Bottom fermented

Colour: amber up to reddish colours (using special malts)

Body: medium

A slight sweet maltiness dominates over a clean hop bitterness

Malt character: light roasted, however, not caramel-like (though a low level of light caramel is acceptable)

Flavour and aroma: slight bread or biscuit character

Hop flavour and aroma: low but noticeable

No fruity esters or Diacetyl

Turbidity allowed

67 *Wood and Barrel Aged Strong Beer*

Analytics

Original gravity:	> 16.0 °Plato
Apparent extract:	> 4.0 °Plato
Alcohol:	> 5.2 % by weight > 6.5 % by volume
Bitterness:	< 20 IBU

Typical Examples:

- *Barrel Aged Strong Porter*
- *Barrel Aged Imperial Stout*
- *Barrel Aged Bock*
- *Barrel Aged Eisbock*
- *Barrel Aged Triple*
- *Barrel Aged Barley Wine*

Description

Top- or bottom fermented

Beers that have been aged over a longer period of time in wood barrels or in contact with wood, and which fulfil the undermentioned criteria for alcohol content

This special ageing process aims to lend the beer a specific character that is either drawn from the wood itself or from the product previously stored in the barrel

Due to the special ageing process, these beers can also have a very low CO₂ content; beers without foam can therefore also be regarded as typical of this type.

Hop bitterness is low

No Diacetyl

Chill-haze is acceptable

Slight to clear traces of barrel are just as typical of these beers as aromas reminiscent of tobacco, sherry or vanilla

Wood and Barrel Aged Strong Beers which are characterized by an acidic taste caused during ageing have to be registered in category 26 Wood and Barrel Aged Sour Beer

The brewery should give the following, additional details of the beer during registration to facilitate the sensory evaluation:

- **Type of beer**
- **Type of wood used (new/old, wood type)**
- **Previous liquids in the barrel if any**

68 *Ultra Strong Beer*

Analytics

Original gravity: > 22.0 °Plato
Alcohol: > 7.9 % by weight
> 9.0 % by volume

Typical Examples:

- *Eisbock*
- *English Barley Wine*
- *American Barley Wine*

Description

Top- or bottom fermented

These beers are often brewed by freezing a Strong Beer and removing resulting ice

Full body and high residual malty sweetness

Alcohol: Despite high ABVs, alcohol should be smooth, can be warming but never harsh

Hop aroma and bitterness: low to moderate

Fruity ester characters are noticeable but sometimes even high and counter-balanced by complex alcohol notes

Bready, biscuit-like and / or caramel flavours are often part of the character

A smoky character is allowed, the flavours of malt, hops and smoky aroma should be balanced

Very low Diacetyl content is allowed

These beer styles are excluded from this category (out of style):

- **Imperial India Pale Ale**
- **Wood and Barrel Aged Strong Beer**
- **Wood and Barrel Aged Sour Beer**

These beers must be registered in the corresponding categories

For accurate judging the brewer must provide additional information about entries in this category at registration:

- **Type of beer**

69 *Non-Alcoholic Lager*

Analytics

Original gravity:	5.0 - 13,5 °Plato
Apparent extract:	0.5 – 7.0 °Plato
Alcohol:	< 0.4 % by weight < 0.5 % by volume
Bitterness:	5 - 50 IBU

Description

Colour: straw yellow up dark brown

Good and dense foam

This beer can be filtered or unfiltered

Hop aroma: low

Malt flavour / smell: very low (dealcoholized beers) depending on the production method to very pronounced (cold contact fermentation process)

No to low fruity ester

No Diacetyl

Attenuation: very slight (cold contact fermentation process) to high (dealcoholized beers)

Body: very slight to medium (with pronounced sweetness)

Taste and smell: slight to clear residual sweetness

Hop bitter: slight to obvious

70 *New-Style Non-Alcoholic Lager*

Analytics

Original gravity:	5.0 – 13.5 °Plato
Apparent extract:	0.5 – 7.0 °Plato
Alcohol:	< 0.4 % by weight < 0.5 % by volume
Bitterness:	10 - 50 IBU

Typical Examples:

- *Dry-hopped Non-Alcoholic Lager Beers*
- *Dark Non-Alcoholic Dark Lager*
- *Non-Alcoholic Lager with spices*

Category change 2022

Description

Bottom fermented

Colour: straw yellow up to dark brown

Body: dry to medium (with pronounced sweetness)

Taste and smell: low to significant residual sweetness

Note: Hop-dominated Non-Alcoholic Hefeweizen are not in this category and must be submitted in category 71 New-Style Non-Alcoholic Beer)

Special Free-Style Beer

Description

The creativity of brewers worldwide is the driving force behind innovative new beer ideas.

Despite the many different categories of the European Beer Star, some beers cannot be classified in the previous categories. In order to give such beers the opportunity to compete at the EBS, the open special category Free-Style Beers is available.

The decisive factor for the participation and acceptance of a beer in this category is the fact that the beer does not fit into one of the existing category descriptions. If the beer still clearly fits into one of the existing categories, that beer will be judged Out-of-Style.

Due to the lack of any analytical characteristic, the rating criteria of this open category are different to those of the regular categories

1. Creativity of the brewer
2. Bouquet
3. Taste
4. Harmony
5. Mouthfeel
6. Overall Impression

Note: in order to give the judges the chance to assess the creativity of the brewer, the participant shall upload a file with the history of the submitted beer. For the file upload, the following criteria apply:

- Maximum file size: 1 megabyte
- File formats: pdf or MS-Word
- Maximum word count: 250 words
- Text in English language
- The name of the brewery or the beer submitted must not appear in the description
- appear in the description
- Collaboration brews can be part of the story, but should not be the main part
- Text should be directed to consumers, not the Jury of experts
